AMENDMENT A

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Applicant provides instant Amendment in response to Office
Action dated 04/10/92.

REMARKS

Examiner rejected claims 20-37 under 35 USC 112, first
paragraph, as lacking support in the specification.

Applicant traverses these rejections for the following
reasons.

(a) The specification is written in such manner as to be
readily understandable by a person having ordinary skill in the
art to which the claimed subject matter pertains.

Such a person would readily recognize that the various
aspects of the claimed invention that Examiner contends not to
be supported by the specification are in fact fully supported
in that they represent nothing more than features that are
inherent in the disclosed subject matter.

For instance, Examiner asks: where is the support for
recitation; in claim 1 ... ".. during said part of each half
period, the instantaneous absolute magnitude of the high freq
AC voltage being substantially equal to half the low-frequency
AC voltage".
